Dr Geo. Engelmann

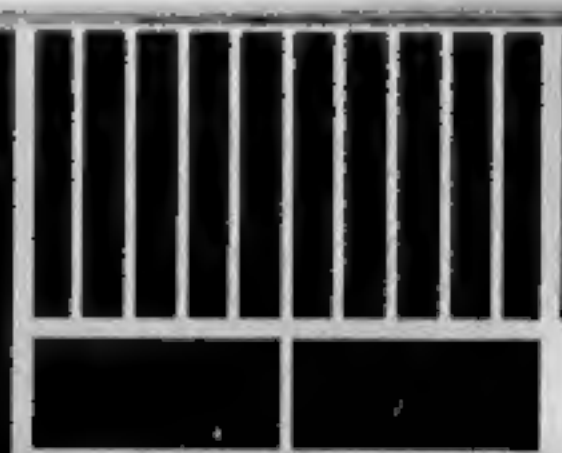

St. Louis Mo.

Dear Sir,

I send you by  
this a couple of Euphorbias  
and Cuscutas for identifica-  
tion. The larger Euphorbia  
grows on a sandy river bottom  
subject to inundation. The  
others I send along for con-  
firmation as this was  
my first season in the  
field and I am rather  
inclined to suspect my  
diagnoses in many cases.

Very Resp

J. J. Davis
